

Freight wagon Kds 67/ Ucs 910

Names in RW: vR Kds67 DB, vR Kds67 Eva, vR Kds67 VTG

Kds 67 is nearly the same wagon as Kds 56 but instead of two containers the Kds 67 uses three made of aluminium later of steel.

First in service in the year 1961 the DB bought 56 wagons until the wagons terminated service at the DB in the 1970s.

Today all wagons are used by private Railwaycompanies here in Germany like VTG or Eva. gsvermögen geändert.

All vehicles use dynamic numbers and have a special plate at the end of the train.

The plate is programmed by script and is visible at ALL wagons for about 5 seconds. After that delay the plate is only visible at the last wagon.

All vehicles use a complete new sound for freight wagons!
